"I found Vertical Learning Curve as I researched courses to complete my strategic credits for my SPHR renewal. VLC offered a Marketing course I could take at my own pace, was interactive, challenging and educational. As an HR professional, I was surprised at how many of the marketing skills apply to my daily work, as well as to my position in my local SHRM chapter. The price per credit hour was also the lowest on the market and I was able to get all my strategic credits done with one class. I will definitely look for additional courses through VLC as I continue my HR education. I encourage all SHRM members to consider Vertical Learning Curve for their personal education as well as for workplace training needs."
